

# MITEK INTEGRATED SOLUTIONS

INTEGRATED SOLUTIONS FOR MORE AFFORDABLE, SUSTAINABLE, SAFE, HEALTHY, EFFICIENT AND RESILIENT HOMES.

## SERVICES

MiTek® provides a range of services to support the efficient growth, capability, and profitability of our customers. Our Plans Services team allows our customers to improve their scalability to without adding overhead. Our software consulting and implementation team enables effective transformation to high-performance processes.

## SOFTWARE

MiTek's Enterprise Software systems optimize the business workflow, including the costing, design, and production of homes. Our SAPPHIRE® 3D Structural Modeling Software also expands the capability of every 2D or 3D architectural software platform — by creating an optimized, buildable, structural frame in a virtual world.

## OFF-SITE MANUFACTURING

Conquer the labor shortage. Off-site design, prefabrication technology reduces cycle times and offers predictable costs, resulting in higher throughput for you, and consistent, high-quality homes for your customers.

## ENGINEERED STRUCTURAL CONNECTIONS

With constant R&D and new products developed every year, MiTek® has crafted thousands of code-compliant engineered solutions that waste less time, material, labor, steps and costs. Since 1955, our solutions have been built on a tradition of innovation and improving customer performance in everything we do.

## SERVICES

### MiTek Engineering Services™

Utilize expert, customized Drafting and Design Services, using structural design software, to guide construction projects from concept to completion. Since 1990.

### Wrightsoft HVAC™ Design Services

Create an HVAC system designed to optimize the home's comfort, efficiency, and indoor air quality, utilizing Wrightsoft's Production Home Design Services.

### Consulting and Implementation Services

Our roadmap, transition and optimization processes enable your teams to transition effectively to our higher-performance software platforms, and maximize your business productivity.

## SOFTWARE

### SAPPHIRE® Build for Home Builders

Optimize operational workflow utilizing this cloud-based, enterprise management suite for builders. Manage all aspects of your business for: marketing, sales, construction operations, product development and customer relationship management.

### SAPPHIRE® Supply for LBM Suppliers

MiTek's SAPPHIRE® Supply is the one stop shop solution for whole-house estimating, framing layout and design. Maximize your productivity and eliminate the guesswork. It's time to digitize the supply chain.

### SAPPHIRE® Structure for Component Manufacturers

SAPPHIRE® Structure delivers powerful structural modeling, editing, and estimating functionality. Gain more efficiency, productivity and more focus on the design process with software that works the way you work.

### MiTek® Builder MT / Sales Simplicity / Options Online™

Best in class enterprise software for residential home builders and their trades. The most award winning technology in home building.

### MiTek® BMT Cloud™ (Coming in 2019)

Leverage the same industry proven platform that underpins BuilderMT, and MiTek's SAPPHIRE® Build, which powers some of the largest-volume home builders today.

### Cubit Estimating Software

Suited to estimators, surveyors, builders and contractors, Cubit delivers a unique and natural solution for estimating your building and construction projects.

### Wrightsoft Right-Suite®

A powerful, fully-integrated residential and commercial 2D/3D CAD solution for HVAC Design and Sales.

## ENGINEERED STRUCTURAL CONNECTIONS

### MiTek® Hardy Frame® Lateral Load Solutions

The only complete line of lateral force resisting products for residential homes – from single family to multi-story, multifamily complexes.

### MiTek® ProSeries® Fasteners

Increase jobsite speed and quality with better performing, structural fasteners. Code compliant. Pro quality. Reduces labor.

### OZCO™ Ornamental Wood Ties

The industry's leading decorative hardware includes the broadest offering in the market – 81 SKUs earmarked by 9 patents.

### USP® Structural Connectors

A complete line of innovative code-compliant construction hardware backed by robust design and placement software, training and technical support.

### M&M™ HVAC Duct Systems

High-efficient solutions from the country's largest producers of sheet metal products in the air distribution and ventilation market.

### MiTek® Anchoring Solutions

Utilize a complete line of high performance epoxies and mechanical anchors for a range of residential applications.

### Z4™ Tie-Down Systems

Save cost, installation and production time with the most economical, uniquely self-adjusting system in the industry to resist wind uplift and seismic forces.

### H&B™ Moisture Barrier Solutions

From foundation barriers to flashings, rely on a superior and complete line of defense against damage caused by moisture.

## OFF-SITE MANUFACTURING

### Roof Trusses

Accelerate cycle times, increase margin, and employ faster, high-quality construction with reduced dependency on framing labor. All-in costs to builders are more competitive and better-controlled than ever.

### Prefabricated Walls

Reduce installation time and all-in cost with precision-designed, precision-produced, code-compliant structural framed assemblies. Components can be produced for even the most custom of homes.

### Floor Trusses

Floor trusses offer an engineered, faster installation, pre-designed floor system with plenty of room for mechanicals. Significantly reduce framing time and eliminate red tags and back-charges.
