

 **SmartThinQ**
Better Life with IoT

Control your Wi-Fi compatible LG comfort system remotely with SmartThinQ®!

Just left for vacation and forgot to change the settings on your air conditioner? Feeling panicky? Worried about wasting energy while not at home?

No need to worry. Now you can control your LG Duct-Free air conditioning units from just about anywhere, using your smartphone.

Features of the App

From anywhere in the house, or while you are out-and-about at a remote location, you can:

- View current temperature settings of the selected unit and change temperature, fan speed and air flow direction
- Multiple users can control the household air conditioning unit remotely
- Monitor filter usage of the unit
- Set-up weekly reservations to start and stop air conditioner activity
- Set-up the unit to run in different modes, depending on your schedule. You can set up specific temperatures for when you are home, away on vacation, or sleeping
- Troubleshoot problems on your own using the Smart Diagnosis function

** Compatible with Alexa and Google Assistant enabled devices - see technical manual for details*

1. To use LG SmartThinQ with full functionality, user must install the app on their smartphone and sign up for a new account and then connect the WLAN module to the indoor unit.
2. Requires OS (operating system) Android 4.1 or higher; iOS 9 or higher
3. Built-in Hardware or WLAN module (Item# PCRCUDT3) and smart phone app together provide monitoring and remote control capabilities with all LG Duct-Free air conditioning units manufactured after 01-01-2018
